

**ASIKO TV**

THE SOUL OF AFRICA

— PARTNER ONBOARDING

List your channel on **Asiko**

Asiko TV is a free, ad-supported streaming home for African audiences across the UK, US, Canada and Europe. Here is exactly what we need from you to launch, and how the ad revenue is shared.

01

What listing gets you

- ◆ **Distribution to the whole Asiko audience** — web now, connected-TV apps (Roku, Fire TV, Samsung, LG) as they roll out.
- ◆ **A share of the advertising revenue your channel generates** — see §3.
- ◆ **No cost to list.** You keep your content, your brand and your rights. Asiko integrates your feed; it does not take ownership of anything.
- ◆ **A guide slot, channel number and on-screen branding** in the Asiko app.

02

What to send us

One email with the items below gets your channel into the pipeline. Items marked **required** are needed to go live; **optional** ones we can help with.

ITEM	DETAIL	
Live feed	HLS (TS or CMAF) URL of your 24/7 linear channel. Tell us the encoding profile — resolutions, video codec, keyframe/GOP	required

ITEM	DETAIL	
	cadence, audio (stereo, and described audio if you carry it).	
Ad-break signalling	SCTE-35 markers in the manifest on every ad break (<code>#EXT-X-CUE-OUT/IN</code> or <code>EXT-X-DATERANGE</code>). If you can't emit SCTE-35, send an EPG precise enough for us to derive the cue points, and your typical break structure (breaks per hour, slots per break, slot length).	required
Ad policy	One of: Clean feed (no ads — Asiko sells all inventory) · Reserved pods (you sell some, and mark a share of each break for Asiko) · Baked-in (your ads already stitched). If reserved pods, state the share for Asiko (e.g. every 3rd slot, or 40% of break time).	required
EPG	XMLTV or MRSS feed — now, next and at least 24–72 hours forward, refreshed when the schedule changes.	required
Rights	Territories you're cleared for, music clearance status, and anything that must be blacked out in specific regions.	required
Brand assets	Channel logo as SVG and PNG on transparent (readable on a dark background), plus a still "off-air" slate frame.	required
Contacts	A commercial contact and a technical contact who can act on feed issues.	required
No live feed yet?	Send a library of transcoded VOD files + a schedule. Asiko can build the linear channel for you (playout engine) and insert the ad markers.	optional

The one thing that most affects your revenue: send a **clean feed with SCTE-35**, or **reserved pods**. A fully baked-in feed can't be measured or optimised on our side, so it earns the least (see §3).

YOUR FEED	WHO SELLS THE ADS	YOUR REVENUE
Clean feed + SCTE-35 or files + schedule	Asiko — our ad server fills every break (direct, private marketplace and open-exchange demand)	A revenue share of the net your channel generates. Typical range is content owner 50–70% / Asiko 30–50% , set by how much the channel drives viewing and by exclusivity. Paid monthly with a statement: impressions, fill, eCPM and your share.
Reserved pods	Both — you fill your slots, Asiko fills the slots you mark for us	You keep 100% of your own pods . Asiko keeps its reserved pods; an override on your pods may apply. You also get a monthly statement for the Asiko-filled portion.
Baked-in ads	You — Asiko can't address your ads	Either an audited revenue share on your reported impressions (with an audit clause), or a flat monthly carriage fee . No performance upside on the ad side.

CDN delivery cost (serving your channel to viewers) is carried by Asiko and factored into the split. Direct sponsorship that Asiko sells around your channel — a presenting sponsor, guide placement — is additional and not shared.

04

What happens after you submit

1

Review & agreement

—
we
confirm
the
feed
spec,
ad
policy
and
rights,
and
sign
a
short

listing
agreement.

2

Normalise

—
we
pull
your
HLS,
condition
it to
one
profile,
and
validate
or
add
the
SCTE-
35
markers.
Your
feed
is
not
re-
encoded
end
to
end
unless
the
profile
is
inconsistent.

3

Test channel

—
your
channel
runs
on
an
Asiko
test
environment,
end
to
end,
with
a
test
ad
break.
You
get
a
link
to
review
it.

4

Your sign-off

—
you
confirm
playback,
branding,
guide
data
and
ad
placement

look
right.

5

Go live

—
the
channel
gets
its
number
and
guide
slot
on
Asiko.
Reporting
starts
from
day
one;
first
statement
at
the
end
of
the
month.

Typical time from a complete submission to a live channel is **days, not weeks**, when the feed is clean and the paperwork is quick.

05

Send it in

Email the §2 items to your Asiko contact at **Media Icons Africa**. Not sure your feed is ready? Send what you have — the feed URL and EPG are enough for us to tell you what's missing.
